PROFESSIONAL SUMMARY

Staff Mobile Engineer with 10+ years of experience delivering secure, scalable native Android and iOS applications to millions of users across cybersecurity, fintech, IoT, and media streaming. Founded Mobile1x, leading a 13-person engineering team to ship an AI-first ERP platform. Deep expertise in mobile architecture, security hardening (OWASP, STRIDE), and cross-functional leadership — with a track record of measurable impact at CyberArk, Commonwealth Bank of Australia (Bankwest), Conviva, and Wipro.

TECHNICAL SKILLS

Mobile	Kotlin, Java, Swift, Objective-C, Android SDK, iOS SDK, Jetpack Compose, SwiftUI, UIKit, AVFoundation, ExoPlayer, BrightCove, Nexstreaming, Firebase Notifications, Firebase Realtime DB, Firebase Storage, Android Services, Content Providers, Broadcast Receivers, Storyboard, XIB
Architecture	MVVM, MVI, MVC, Clean Architecture, Dependency Injection (Hilt, Dagger, Koin), Architectural Decision Records (ADRs)
Reactive	Kotlin Coroutines, Flow, Combine (Swift), RxJava
APIs & Backend	REST, GraphQL, gRPC, Retrofit, Alamofire, Protobuf, JSON, Gson, Java Spring, Spring Boot, JAX-RS, Google Maps
CI/CD	GitHub Actions, Jenkins, TeamCity, CircleCI, Bitbucket, Firebase App Distribution
Testing	JUnit, Espresso, XCTest, Robolectric, Mockito, TDD, BDD, Python Appium, Browserstack
Security	OWASP Mobile Top 10, STRIDE Threat Modeling, Android Keystore, iOS Secure Enclave, TeeSDK, DexGuard (GuardSquare)
Cloud	AWS EC2, CloudTrail, RDS, Route 53
Analytics	Firebase Analytics, Mixpanel, Conviva, Amplitude
Tools	Android Studio, Xcode, Firebase, Crashlytics, Sentry, App Store Connect, Play Console, CyberArk, Conviva, JIRA, Confluence, Slack, Teams, Figma, Adobe XD, Gradle, CocoaPods
Additional	Bluetooth Low Energy (BLE), TensorFlow Lite, Agile/Scrum, C#/.NET, SQL Server

PROFESSIONAL EXPERIENCE

Staff Software Engineer
Nov 2024 – Present

CyberArk · Hyderabad, Telangana, India

App: iOS | Android

- Architected and shipped secure TeeSDK using Android Keystore and iOS Secure Enclave, reducing the vulnerability footprint by **40%**.
- Engineered a biometric tamper-detection fix that eliminated authentication bypass vulnerabilities, protecting CyberArk's global user base.
- Designed a multi-layer Secured Storage cache (TeeSDK + DataStore) ensuring reads are consistently faster than writes, cutting cold-start latency by **28%**.
- Applied STRIDE threat modeling across the mobile stack, proactively identifying and remediating high-severity attack surfaces.
- Delivered offline sync capabilities enabling secure item Copy/View/Edit without network connectivity.
- Obfuscated the mobile application using DexGuard (GuardSquare) with string encryption, exceeding the protection limits of ProGuard and R8.
- Automated regression coverage via Python Appium and Browserstack, increasing test reliability across device matrix.

Technical Lead (Contract)
Mar 2024 – Nov 2024

Coforge / Bankwest (Commonwealth Bank of Australia) · Bengaluru, Karnataka, India

App: iOS | Android

- Led cross-platform mobile feature delivery for a digital banking app used by millions of Australians, shipping three high-priority features with zero rollbacks.
- Reduced password reset failures by **35%** through targeted UX and backend integration improvements.
- Overhauled the travel notification UI and implemented AUD-to-multicurrency conversion, enabling seamless global transactions.
- Integrated .NET code coverage reporting into TeamCity via Splunk and Jenkins, improving build reliability and test visibility.
- Championed modularization, TDD, and CI/CD best practices across the team, accelerating delivery cadence.

Founder & CEO
Sep 2023 – Mar 2024

Mobile1x · India (Remote)

- Founded Mobile1x, recruited and led a 13-person engineering team to design and build an AI-first ERP platform from the ground up.
- Defined product architecture, established engineering processes, and drove end-to-end delivery across mobile and backend services.
- Delivered **ParkPayz** — a client-commissioned iOS parking management app — from requirements through App Store launch.

Senior Software Engineer
May 2022 – Sep 2023

Conviva · Bengaluru, Karnataka, India

- Integrated ExoPlayer into the Android SDK, achieving **100% ExoPlayer compatibility** and reducing client-reported issues by **45%**.
- Resolved CSAI/SSAI ad tracking failures, restoring ad reliability across high-traffic streaming clients.
- Implemented subtitles and closed captioning accessibility features across five platforms.
- Migrated Android sensors to support Android 13 and 14, maintaining full backward compatibility.
- Diagnosed memory leaks at ShareChat by redesigning the threading architecture, eliminating OOM crashes and improving app stability.
- Optimized Android TV UX, improving engagement and usability for large-screen audiences.

Senior Software Engineer Dec 2019 – Apr 2022

Intellicus Technologies (Kyvos) · Bengaluru, Karnataka, India

App: Android

- Reduced app crashes by **32%** and accelerated dashboard load times by **40%** through targeted performance profiling and optimization.
- Stabilized OLAP dashboards by implementing dynamic filters and enhanced charting, improving data visualization fidelity.
- Migrated the codebase to Kotlin, enabling modern unit testing practices and improving long-term maintainability.
- Integrated Firebase Crashlytics, FCM, and Firebase Distribution, streamlining crash monitoring and release workflows.

Senior Software Engineer — Smart Cities BU Dec 2014 – Dec 2019

Wipro · Bengaluru, Karnataka, India

Apps: Track & Trace | Auto Insights | ELCITA Citizen

- Improved civic service workflow efficiency by **50%** and reduced escalation volumes by **20%** through mobile-first service management tools.
- Built a BLE-based proximity marketing platform from zero to production.
- Delivered an end-to-end Smart Home Solution including backend APIs and a Chatbot built with Decision Trees, handling intent recognition and home automation commands.
- Developed real-time Android live location sharing for Wipro Auto Insights — shipped ahead of WhatsApp's equivalent feature.
- Delivered feedback and ticketing platforms for ELCITA and internal Wipro operations, streamlining issue resolution workflows.
- Automated the SSIS interface migration from IBM using C#/.NET and SQL Server scripts, reducing migration time by **90%**.

NOTABLE PROJECTS

AISimilarity.com Personal Project

Multi-platform web app for Android & iOS developers · www.aisimilarity.com

- Built and launched a multi-platform web app offering interview Q&A, Android/iOS quizzes, and 2 developer games — covering cross-platform mobile concepts.
- Grew to **4,000+ views** organically with zero paid acquisition.

CodeForumBlogs.com Personal Project

Developer blogging & community forum platform · www.codeforumblogs.com

- Designed and built a developer-focused platform combining technical blogs and community discussion forums.
- Shipped and launched the full blogs module; forum module in active development.
- Grew to **10,000+ organic views** with zero paid acquisition.

EDUCATION

M.Tech, Computer Science 2015 – 2019

BITS Pilani (Work Integrated Learning Programme)

Bachelor of Computer Applications (BCA) 2011 – 2014

School of Computer Science and I.T
